

MATH LEARNING OPPORTUNITY FOR TOPS ADULTS

- Are you confused about how to help your child with his/her math homework?
- Does your student tell you “that’s not how the teacher does it.”
- Do you want to try out some math problems in a safe learning environment?
- Do you like homemade treats?

If you answered “YES” to any of the above, we have got just the thing for you.

TOPS Math Specialist **Debbie Bernmet** is leading three 45 minute sessions that will show you what your elementary children are learning in *Everyday Math*.

You will get to try your hand at algorithms (problem solving procedures) such as partial sums and partial quotients as well as some “mental math” and other routines your kids are doing on a regular basis.

Please RSVP by Wed Jan 28th

so we can provide adequate meeting space and treats.

If we don’t receive enough RSVP’s we will cancel a session.

RSVP by returning bottom of form or sending an e-mail to dsbermet@seattleschools.org stating session and your child(ren)’s name(s) and grade(s).

Session Dates and Times (circle 1)

Friday Jan 30th	2:30-3:15 pm	Adult(s) attending _____ Child(ren)’s name(s) and grades _____
Monday Feb 2nd	8:30-9:15 am	Adult(s) attending _____ Child(ren)’s name(s) and grades _____
Monday Feb 2nd	5:15-6:00 pm	Adult(s) attending _____ Child(ren)’s name(s) and grades _____

Please provide a contact phone # or e-mail address. _____

One topic I would like to learn about is _____

Note: this is NOT an appropriate forum to debate the merits of “new” math vs. traditional math.
